Greetings***

Geoscience Exhibition Kyoto 2023

<https://www.gsj.jp/en/>

The Geological Survey of Japan (GSJ) organizes a Geoscience Exhibition for the public at the annual Geological Congress.

The main theme of the Geoscience Exhibition Kyoto 2023 is “Knowing the Geology and Protecting the Future of Kyoto”.

Geological map with topographic shading. Older geological age is represented on the map by darker green colors.

Permian bedded chert. The Kiyomizu-dera Temple, as illustrated on the opposite side, was constructed on Permian bedded chert.
